

SupReMo™

3 BEDROOMS • 2 BATHS • INSTALLATION IN AS LITTLE AS 3 DAYS
FOOTPRINT: 26'-8" × 51'-2 1/8"

REMO
HOMES

This single-story, 1,365 SF modular home blends contemporary simplicity with best-in-class energy efficiency and wildfire resilience. The efficient three-bedroom layout emphasizes natural light and comfort, reflecting ReMo's vision for modern living with wellness and sustainability at the center.

Design Highlights

- Open and efficient floor plan with abundant daylight
- Factory-installed HVAC, solar, and battery system
- Durable steel-framed composite walls — heavily insulated and termite-free
- Standing-seam metal roof that exceeds Class A material requirements for wildfire zones
- High-performance windows and insulation to reduce energy bills
- Built for longevity with low-maintenance finishes

Built Smarter

- Standardized build with a resilient supply chain, ensuring ultra-fast deployments
- Precision manufacturing ensures uncompromising quality
- Zero-carbon, all-electric design exceeding 2022 Title 24 standards
- Factory-integrated systems reduce soft costs and installation time
- CalGreen-compliant materials for healthier indoor air
- Turnkey delivery—SupReMo™ is preassembled in the factory and connected to utilities and foundation on-site
- On-site installation in as little as 3 days
- From order to installation in ~6–12 months

Structure & Systems

Exterior — Steel-encased insulated panels, fiber-cement trim, Class A metal roof

Interior — Non-toxic cabinets and countertops, integrated LED lighting, high-efficiency ENERGY STAR® appliances

Mechanical / Electrical / Plumbing — High-SEER heat-pump system, energy-saving fixtures, smart-ready power panel, EV charger, factory-installed fire sprinklers

Sustainability & Resilience

- Designed to withstand wildfire, high-seismic, and wind-load conditions
- Full solar with an integrated 5 kWh battery comes standard
- Recyclable core materials with reduced embodied carbon
